

Interface Technical Specification

Technical Specification – KwêBeams Wireless Interface Module	
Dimensions:	60(H), 65(W), 40(D)
Average Power consumption:	60 uA
Power Supply Input:	10 – 14V DC
Output:	1 X Relay output (10A / 28VDC) with programmable output delay. 1 X 10mA Open Collector output
Input:	2 X programmable digital inputs (0V – 14V DC) <ul style="list-style-type: none">- Panic input (Triggers all beam sirens)- Arm / Disarm Kwêbeam system- Alarm & Tamper monitoring
Kwêbeam Radio:	2-Way wireless communication with repeater function - 868 Mhz
